PRESIDENT'S MESSAGE 2018-2020

Dear Members of Congress of the Mexican Association of General Surgery and Members of the Panamerican Trauma Society.

Greetings on behalf of the Panamerican Trauma Society and the Executive Committee. For us, it is an honor to participate for the first time in Mexico in conjunction with the Mexican Association of Surgery.

The history of emergency surgery, acute care, and surgical intensive care should in no way be alien to the specialists in general surgery who face patients every day.

It is unfortunate to have to meet virtually. The current situation has taught us and forced us to exploit remote capabilities, which were most likely unthinkable for many.

Something "positive" about this pandemic is that we have saturated our agendas of virtual seminars with clinical cases and interesting topics that far exceed the capacity of the sessions that one could attend in a face-to-face conference. We have been able to exchange points of view and opinions with other colleagues from the American continent and also from others. Regarding trauma and emergency surgery, we have perceived the limitations and individual problems of each country and the forms of a solution, sharing their experiences with us.

We cannot stop thinking about a large number of deceased health personnel in Latin America, many of them surgeons who were collaborating with other specialists to resolve this critical situation. My deep respect and gratitude to all of them and my wish for comfort to their families. To all of them, we owe this congress in tribute.

Our congress will try to meet the expectations of bringing education within reach to those who rarely can accompany us through different circumstances.

We will have national and international professors of very high academic levels who will participate in pre and post-congress courses, in symposia, in our traditional discussion of North versus South live clinical cases, the session challenges in surgery, and the discussions with experts. On this occasion, we will have expert leaders on aortic occlusive balloon as an aid in traumatic hemorrhagic resuscitation.

In such a way, we undertake this new form of distance education. Welcome to the XXXIII Pan American Congress on Trauma, Critical Care, and Emergency Surgery.

Sincerely,

Dr. Felipe Vega (México)
